Sujet : Monetize your newsletters and websites with sponsored content

Votre message : Hi pouldreuzic.bzh,

Paved is a one-stop platform for publishers to monetize their newsletters and websites with sponsored content, native email ads, and dedicated sends. (It focuses on monetizing newsletters, but it does offer a "Sponsored Blog Post" option to help you monetize your site.)

It supports publishers in working with top-tier advertisers (for example: Hopin, Uber, Ramp, and Dropbox) filling ad inventory, streamlining sponsorship operations at scale, and increasing sponsorship revenue.

The platform can simplify newsletter monetization with automated matching against high-quality advertisers so that only relevant ads reach subscribers.

With a payout per click averaging \$1.45 over the past 30 days, Paved proves its dedication to maximizing publisher revenue: <https://www.moredollar.info/paved> .

The platform hosts more than 1,700 newsletters (Famous sites that have joined the platform: fortune.com, entrepreneur-com, techcrunch.com, and so on) that reach over 253 million subscribers in multiple niches.

You will like its easy setup, with only a basic code snippet needed to insert ads into newsletters/websites seamlessly.

These attributes make Paved the optimal newsletter ad network for those publishers looking for effective and profitable monetization tools: <https://www.moredollar.info/paved>

Regards,
Andrew Mulford

(Sponsored Blog Post - A blog post written by you or the advertiser posted on your site. Generally in a how to, review, or editorial format.)
